

Monogram Styles

A traditional monogram for an individual has the first initial first, the last name initial larger in the middle, and the middle name initial on the end.

A traditional monogram for a wedding couple (if a combined monogram) has his first initial on the left, their last name initial larger in the middle, and her first name initial on the left. Just the last name initial is nice as well!

Initials have all of the letters the same size: first, middle, last.

Single initials can usually be more fancy, since they can be larger on the item.
